Cimco Refrigeration

Just wanted to let you know that the electric Desiccant Dehumidifier that was installed at the MA-TE-WAY Activity Center in Renfrew On. this past summer has performed beyond expectations.

The air and ice quality are both at a recognizable difference and this is showing a great difference in our compressor run times being down from last year at this time. We had absolutely no condensation or fog at all compared to last year's start up which was very comparable in outside temperatures as the temp was in the high 30's both years.

Thanks again for your great service and product information over the years.

Randy Pender
