Attn: Gino Battel,

Re: Spiral Freezer Project – Inovata Foods Corp.

Dear Gino,

I would like to take a moment to thank you and your team for the outstanding service you have provided during our Ammonia Spiral Freezer Installation Project. I particularly appreciate the extra effort you put in during the design phase to look at the various options and your patience with us while we sought something efficient yet affordable. You were also instrumental in connecting us with a specialized refrigeration energy consultant that allowed us access to funds available through the Ontario Save On Energy program. This allowed us to afford the most efficient system possible. I am very happy with the Frick variable speed system. This will make a significant impact on our plant operating cost and market competitiveness in our sector.

In addition, I would like to commend your installation team. Henry Roefs and company were well prepped in advance of work dates and dealt with any adversity quickly and professionally. The work went as though it was practiced and rehearsed. The job was delivered on time and I commend them on their ability to bring it all together in the short construction window provided. I would also like to thank the Frick service technician for his patience, expertise and enthusiasm during commissioning of the system.

I would highly recommend Cimco Refrigeration to others and look forward to working with you on the next project.

Kind regards,

Dez Peterson

Director of Process Improvement
