Dear Brian,

I hope this letter finds you well.

I am writing to thank you and the entire staff at CIMCO for a job well done at the new Wachter Rink. The installation and operation of the new direct CO2 packaged unit installed as part of this new single sheet rink has come back to me with glowing reviews from the both the Owner and user groups.

From the perspective of an architect, my primary concern is meeting the expectations of our client. Equally important is meeting the expectations of the user groups that will skate this rink daily. This never truer than when we are asking them both to trust us as we proceed with this innovative technology as part of such an important public project. I can say with all certainty that this system including the integration with the building HVAC system worked perfectly and has exceeded those expectations. In addition, the professionalism that CIMCO and its staffed showed handling the installation and commissioning was top notch. I would with out a doubt recommend this technology and CIMCO in the future.

As a member of the user groups (coach, player and parent), I have found the ice condition to be the best in the state of North Dakota. It is consistent and fast. The system responds quickly between floods and maintains quality ice during the busy schedules.

Please share this letter with Ben and the rest of the crew at CIMCO.

Best Regards,

Jeffrey J. Ubl  
President
