To Whom it May Concern:

This letter is written as a testimonial for Cimco Refrigeration, #2 - 2180 Pegasus Way N.E. Calgary, Alberta, T2E 8M5.

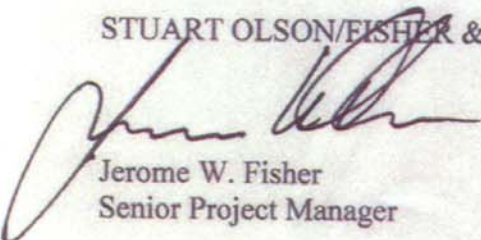

On February 10, 2005 a fire consumed the roof of the Lamb Weston 160,000 Sq. Ft. freezer located east of Taber, Alberta. This fire totally destroyed the building insulation envelope, electrical, refrigeration and fire protection system. Through the exceptional efforts of an elite team of Stuart Olson/Fisher & Sons ULC and hand chosen subcontractors, the building was restored to its full operating condition, going cold on April 22, 2005, 71 days after the fire. The work was completed during the early spring in Southern Alberta despite immense weather challenges; severe wind, cold, snow, rain and infrequently, sun.

Stuart Olson/Fisher & Sons ULC and Lamb Weston are especially pleased to commend Cimco for the efforts expended on the project. Their people, Wayne Dilk and Greg Rankin were on the site 12 hours after the fire. Within 24 hours they had prepared a preliminary budget, agreed on scope and schedule and mobilized to commence work. Their field superintendent, Marty Sjogren was one of the keys to the success of this project as well as Mitch Moffitt and Dallas Shepherdson. All were proactive in solving problems and moving this project to a successful conclusion, on time and within their preliminary budget. We cannot applaud their work and efforts any more enthusiastically.

It is our intent to demonstrate herein that this subcontractor will be given every opportunity to work with all of our firms in the future should there be a requirement and we highly recommend them to any firm with a need for their expertise. Feel free to use us for a reference, we would enjoy giving you a recommendation.

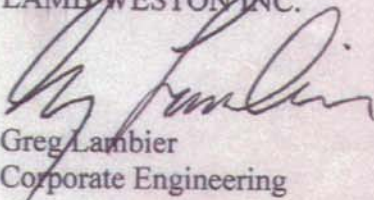

Yours very truly,

STUART OLSON/FISHER & SONS ULC
