RE: CIMCO Refrigeration

We have used CIMCO Refrigeration as a key supplier for many years on several important chilled water plants on projects in Canada, USA, Mexico and China and we highly recommend CIMCO Refrigeration as a prime supplier who is reliable and can deliver on time and within budget.

CIMCO is very well qualified and have a technically talented team who can clearly develop and execute refrigeration projects very well. CIMCO is also prepared to look at value engineering a project to help reduce costs but without sacrificing quality. They are very professional, have strong problem solving skills, keen customer service, and an excellent work ethic.

Their systems perform as designed and specified and have always provided the capacities as promised.

We are pleased to recommend CIMCO Refrigeration as a reliable and capable supplier.

Yours truly,

Cosma Structural Systems
