

LETTER FOR REFRIGERATION B OPERATOR TRAINING

PROVIDED BY

TONY PANETTA

February 24 2012

To whom it may concern:

With this letter I would like to recognise the level of training that was provided to my maintenance department staff. Tony and his group worked with us from the start, custom designing a training program for my group that would meet our needs and timelines. The program was extremely detailed and presented in a manner that could be followed by people of varying skill levels. During or exam process we achieved a success level that was better than we hoped for. My people had nothing but praise for the program they were provided. I would personally recommend the program to any establishment that is interested in training new operators of their own.

Kevin Dimmell

Maintenance Manager
